Welcome to MIE2011

On behalf of the Norwegian Society for Medical Informatics (FDH) we invite you to the 23rd European Medical Informatics conference – MIE2011 – in Oslo, Norway, August 28th to 31st, 2011. MIE2011 is co-hosted by FDH and the European Federation for Medical Informatics (EFMI).

MIE2011 is the primary venue for the European health informatics community, and recent advances in the field will be presented as scientific papers, posters, demonstrations, panels, tutorials and workshops. MIE2011 will also host the Scandinavian Health Informatics (SHI) conference, a National e-health day and a training course by the Norwegian Medical Association, and there will be a pre-conference on Human Factors Engineering in Health Informatics

The MIE2011 theme is “*User Centred Networked Health Care*”. We aim to highlight real user experiences in increasingly socially and technologically networked health care. The chosen theme also emphasizes the Scandinavian tradition of participatory design; the crucial importance of the users’ contributions to systems development and sustainable use when health care professionals is part of (virtual) teams with colleagues and patients.

A visit to Norway is a unique opportunity to enjoy the beauty of Scandinavia with breath taking mountains and fjords, vibrant cities and towns, ancient cultures and amazing wildlife.

© John Kvalnes, VisitOslo

Oslo is a city known for contrasts and diversity. The beautiful natural surroundings, varied architecture, and multinational inhabitants all contribute to the unique atmosphere of this modern city. The easy access to forest and mountains within the city limits provides recreational opportunities for both natives and visitors. Oslo is the home of cultural giants like Edvard Munch, Gustav Vigeland, Thor Heyerdahl and Henrik Ibsen. The Munch Museum, the Kon-Tiki Museum, the Polar ship Fram Museum, The Viking Ship Museum, the National Gallery, the Norwegian Folk Museum, the Vigeland Sculpture Park and Museum are all internationally known.

Welcome!

The MIE2011 team

Major conference topics

Electronic Health Record
Telemedicine and Mobile Health
Citizen-centred e-Health
Imaging and Bio signals
Terminology, Ontologies and Standardization
Information Modelling, Storage & Retrieval
Decision Support, KM, Guidelines
Usability, HCI, Cognitive Issues
Evaluation
Privacy and Security
Translational Research
Education – professional development
Public Health, Catastrophes, Outbreaks

Conference overview

- 210 scientific presentations in 35 sessions
- 26 workshops
- 4 panels
- 50 posters
- Partnership in innovation
- Village of the future - including demonstrations
- Commercial exhibition
- Scandinavian Health Informatics meeting (see www.shi2011.org for details)
- National e-health day and training course

Keynotes

- Marie-Catherine Beuscart-Zéphir:
Human Factors and Usability for complex Health Information Technologies: Why do you care?
- Susanna Palkonen:
New patient – new technologies, new networks
- Stephen Kay:
The Usability (or not) of Health Informatics Standards
- Kirsten Haaland:
Mastering Open Source Software challenges in a niche market
- Camilla Stoltenberg:
When the whole population contributes to knowledge. On health registries in Norway.
- Nick Barber:
Envisioning the patient, medicines, technology triad

Awards and prizes

The Peter Reichertz Prize (best paper by a young investigator); The Rolf Hansen Prize (best paper relating to the electronic patient records); Best Poster Award.

Visiting Akershus University Hospital

All conference participants are invited to Akershus University Hospital for the opening day. The hospital was completed this year, and is one of the most modern and technologically advanced hospitals in Europe. Transport and all activities are included in the conference fee.

In the morning, there will be parallel activities focusing on the following topics:

- Fully Integrated Electronic Patient Record /Clinical Information System
- Diagnostic Imaging / Radiology
- Fully automated laboratory
- Medication automation
- HealthCare of the future
- Collaboration and continuity, lessons from changing practices
- Information exchange and cooperation across levels of care
- Pathology
- Tour of the hospital

Activities are selected as part of the registration process on a first-come-first-served basis.

The opening ceremony and the get together will also take place at the hospital.
